Food Marketing and Regulation (A07822)

Short Title: Food Marketing and Regulation
Faculty Science and Computing
Department Science
Cluster Food Science
Author EKENT
Credits 5

Level: Introductory

Description of Module / Aims

This module aims to introduce the student to the principles of marketing applied to the Irish food and agribusiness industry, in support of understanding the dimensions of both the food sector and the consumer. A review of the marketing environment, the factors influencing the consumer buying process, the new product development process and associated marketing mix elements will be conducted. The application and enforcement of food standards including food traceability and non-conformance is also covered.

Programmes

MARK-0191	BSc (Hons) in Food Science and Innovation (WD_SFSIN_B)	2 / 4 / M
MARK-0191	BSc in Food Science with Business (WD_SFDSC_D)	2 / 4 / M

Indicative Content

- The marketing environment: micro and macro forces impacting on stakeholders in the food sector; SWOT of food businesses
- Consumer and organisational buying behaviour: factors impacting on consumer, household and organisational buying behaviour in the Irish food industry; the steps in the buying process; the concept of derived demand
- Marketing research: researching the evolving needs and wants of the Irish consumer and customer; secondary and primary research methods
- Product labelling: the product life-cycle; new product development across the food sector
- Price-cost based; value-based and competition-based pricing strategies in the dairy and meats sectors
- Place: channels of distribution; centralised distribution in the Irish retail sector
- Promotion: communication campaigns of commercial and non-commercial stakeholders involved in the food sector
- National laws and regulation, international laws, EU laws and regulation
- Traceability of food and non-conformance of food products

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Explain the fundamentals of marketing in the environment in which it operates.
2. Discuss case studies.
3. Report and present a food marketing study including full traceability of a food product.
4. Identify integrated marketing mix strategies for new food product offerings.
5. Discuss national, EU and international regulations and their application and enforcement.

Learning and Teaching Methods

- Lectures.
- Class and group discussions.

- Case studies.
- Self-study of assigned readings and texts.
- Pre-class preparation of readings and case-studies for in-class discussion.

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	1, 2, 3, 4, 5

Assessment Criteria

- <40%:** Very limited knowledge and understanding of the subject matter. Lacking in technical ability/skill and understanding to carry out practical/professional tasks.
- 40%-49%:** Demonstrate a limited knowledge of the subject matter. Show some technical ability/skill in carrying out and reporting on practical/professional tasks.
- 50%-59%:** Demonstrate satisfactory general knowledge of the main issues within the subject. Logically and competently carry out practical/professional tasks.
- 60%-69%:** Demonstrate sound knowledge of the subject matter. Show ability to analyse and logically argue in an effective and mature style. Demonstrate initiative and the ability to criticise methods used and appreciation of experimental design when carrying out practical/professional tasks. Projects and reporting coherent and soundly structured illustrating wide and in depth reading on subject coupled with the proper use of references.
- 70%-100%:** Demonstrate authoritative handling of complex material and a highly developed and extensive understanding of the subject. Provide well focused analysis and convincing argument on the subject. Demonstrate imaginative approach, excellent technical ability, awareness, and aptitude in carrying out and reporting on practical/professional tasks.

Note:

- In addition to the normal regulations, a minimum of 35% must be achieved in both the final exam and continuous assessment components of the module. In cases where continuous assessment has a practical component attendance of at least 75% in the practicals is mandatory
