Industrial Placement (Food Science) (A14702)

Short Title: Industrial Placement (Food Sc)
Faculty Science and Computing
Department Science
Cluster Placement and Projects
Author EKENT
Credits 30

Level: Intermediate

Description of Module / Aims

Students will be placed for work experience in food processing/food business/research for three months during the first semester of the third year of their programme (i.e. September to December). The aim of this placement is to expose the student to the organisation and management of an industrial production/research facility. The placement is designed to allow learners to apply and develop their knowledge and skills in a food company or research facility, working to accredited quality standards, thus enhancing their professional development.

Programmes

PLAC-0148	BSc (Hons) in Food Science and Innovation (WD_SFSIN_B)	3 / 5 / E
PLAC-0148	BSc in Food Science with Business (WD_SFDCS_D)	3 / 5 / E

Indicative Content

- Work placement in a food business company for an extended period, with exposure to a range of laboratory, processing and business activities
- Exposure to a range of quality and food safety systems or standards and be capable of evaluating the effectiveness of these
- Preparation of reports, both oral and written, on work carried out over the period of placement
- Presentation of reports at seminar and oral
- Maintenance of a log of work experience, critical evaluation and reflection on both the experience itself, as well as the professional development achieved during the experience
- Interpretation and critical evaluation of results of scientific or business procedures carried out during the placement
- Ability to work individually and as part of a team

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Construct a professional CV and prepare for interview to secure placement.
2. Plan learning objectives for the placement.
3. Operate independently and/or as part of a team towards the set objectives of the food based business or food research facility.
4. Apply competently their food science knowledge and skills in a range of settings.
5. Practise safely, laboratory and food industry related skills and employ good environmental practices.
