Farm Buildings (A14402)

Short Title: Farm Buildings
Faculty Science and Computing
Department Science
Cluster Engineering
Author SWALSH
Credits 5

Level: Intermediate

Description of Module / Aims

This module is designed to give the student the theory and practice of basic farm building projects. Students will learn about building materials, how to plan a building project, and how to carry out basic construction and maintenance tasks associated with a farm building project.

Programmes

CONS-0016 BSc in Agriculture (WD_SAGUL_D)

3 / 6 / M

Indicative Content

- Planning
- Building materials
- Component structures
- Building and maintenance tasks
- Plans

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Determine the limitations that the planning laws and regulations place on farm developments.
2. Categorise materials used in farm building construction.
3. Complete safely, building and maintenance tasks in accordance with good environmental practices.
4. Interpret and read plans and specifications.
5. Distinguish good environmental practices in the construction of farm buildings.
6. Determine good practices and health in construction.

Learning and Teaching Methods

- Lectures.
- Practicals in the buildings workshop.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	50%	1,2,4,5,6
Continuous Assessment	50%	
<i>Practical</i>	50%	3

Assessment Criteria

- <40%:** Very limited knowledge and understanding of the subject matter.
- 40%-49%:** Will be able to show a basic knowledge of the key learning outcomes including a basic knowledge of planning laws and regulations, building materials and describe and apply good practices and health in construction.
- 50%-59%:** As well as the above the student will be able to demonstrate an understanding of some of the complexities of the topics, describe and apply good environmental practices in the buildings workshop and demonstrate good building and maintenance ability.
- 60%-69%:** In addition, the student will demonstrate more detailed knowledge of the all topics including a very good ability at building and maintenance.
- 70%-100%:** The learner will be able to demonstrate comprehensive knowledge and understanding of all learning outcomes including an excellent ability at building and maintenance.

Note:

- In addition to the normal regulations, a minimum of 35% must be achieved in both the final exam and continuous assessment components of the module. In cases where continuous assessment has a practical component attendance of at least 75% in the practicals is mandatory.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	12	
Practical	36	
Independent Learning	87
