

Audio Visual 2

Computing and Mathematics

May, 2026

Short Title:	Audio Visual 2	
Faculty	Science and Computing	
Department	Computing and Mathematics	
Cluster	Media Production	
Author	ROCONNOR	
Credits	5	Level: Intermediate

Description of Module / Aims

This module focuses on visual media. Students develop design skills further in composition, graphic design, advertising, typeface, layout and audio synchronisation. Photography skills are developed and then applied to video capture. All elements are combined in the creation, editing and publishing of a short video.

Programmes

COMP -0646 BSc (Hons) in Applied Computing (WD_KCOMP_B)

2 / 4 / E

Indicative Content

- Visual image principles
- Design Principles
- Camera Settings
- Video recording, editing and rendering
- Audio synchronisation
- Titles, transitions and simple motion graphics

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Compare and contrast artwork using design principles.
2. Demonstrate practical use of image composition.
3. Produce digital video based on a prescribed script/storyboard.
4. Combine audio and visual media to create a multi-layered asset.

Learning and Teaching Methods

- This module will be characterised by student participation in both formal theoretical and practical/ studio classroom activities in which students learn theoretical concepts and apply them immediately using dedicated hardware and software.
- Studio Classes will be delivered in two 2-hour blocks.
- Apple Mac Computer Lab with relevant hardware & software (kept up to date at least annually e.g. AdobeCC, iMovie).
- Accessible, professional sound proofed recording studios with professional microphones and audio workstations (Vibe FM studios).
- Access to cameras.
- Video/Photography Studio
- Sample Assignment: Create or recreate a static poster/ad/visual artefact to a specific design.
- Sample Project: Record, edit and finalise a video based on a script/storyboard.

Assessment Methods

	Weighing	Outcomes Assessed
Continuous Assessment	100%	
<i>In-Class Assessment</i>	10%	1
<i>Assignment</i>	30%	2
<i>Project</i>	60%	3,4

Assessment Criteria

<40%: Unable to interpret and describe key concepts of the audio/visual communications and associated tools.

40%-49%: Be able to interpret and describe key concepts of the audio/visual communications and associated tools.

50%-59%: Ability to discuss key concepts of the specific audio/visual communications and ability to discover and integrate related knowledge from design and computing disciplines.

60%-69%: Be able to solve problems within the specific audio/visual domain by experimenting with the skills and tools.

70%-100%: All the above to an excellent level. Be able to analyse and design solutions to a high standard for a range of both complex and unforeseen problems through the creative use and modification of appropriate audio/visual skills and tools.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Practical	48	
Independent Learning	87
