Project Management for Land Sciences (A11481)

Short Title: Project Management (Land Sc)
Faculty Science and Computing
Department Science
Cluster Business
Author NMCGRORY
Credits 5

Level: Advanced

Description of Module / Aims

This module aims to provide the student with the ability to develop an understanding of project management in context, to show the importance of the planning process in ensuring project success, to provide the student with the ability to define and build project plans, to estimate project durations using appropriate software tools, and to apply appropriate tools and techniques to control and monitor project schedules.

Programmes

PROJ-0165	BSc (Hons) in Land Management (in Agriculture) (WD_SBSAG_B)	1 / 1 / E
PROJ-0165	BSc (Hons) in Land Management (in Forestry) (WD_SBSFO_B)	1 / 1 / M
PROJ-0165	BSc (Hons) in Land Management (in Horticulture) (WD_SBSHO_B)	1 / 1 / M
	Higher Diploma in Science in Agri-Food ICT Systems (WD_18AFICT_G)	1 / 3 / M

Indicative Content

- Introduction to project management
- Project life cycle
- Feasibility study
- Project design and planning: work breakdown structure, critical path network, project risk management, project change management, project quality control
- Project execution: reporting, communication etc.
- Project completion and handover
- Project cost measurement and management: the concept of earned value
- Project documentation
- Managing a project team: leadership, resource allocation, HR implications, the role of the project manager
- Using project management tools and techniques

Learning Outcomes

On successful completion of this module, a student will be able to:

1. Evaluate the application of the principles of project management.
2. Design and build project management plans.
3. Estimate project durations using appropriate software tools.
4. Create, control, monitor project schedules using project management software.
5. Evaluate the HR aspects of project management - organisation, roles, attributes of the project manager, the role of sponsor etc.
6. Estimate project costs, produce project cash flow statements, report on earned value, analyse cost variances and produce estimates at completion.
7. Evaluate the design and management plans for a variety of projects.

Learning and Teaching Methods

- Formal lectures.
- Practical IT laboratory exercises.
- Relevant case studies.
- Class discussions and presentations.
- Assigned self-learning.

Assessment Methods

	Weighing	Outcomes Assessed
Final Written Examination	70%	1,5,6,7
Continuous Assessment	30%	
<i>Project</i>	30%	2,3,4

Assessment Criteria

<40%: Very limited knowledge and understanding of the subject matter.

40%-49%: Will be able to show a good knowledge of the key learning outcomes including how to develop their competencies as a business professional.

50%-59%: As well as the above the student will be able to demonstrate a good understanding of the key learning outcomes as well as be able to exercise judgement and convey a professional image.

60%-69%: In addition, the student will demonstrate more detailed knowledge of all the topics and be able to employ reflective thought as well as decision making and problem solving.

70%-100%: The learner will be able to demonstrate comprehensive knowledge and understanding of all learning outcomes and be able to recognise the inter-relationship between their role as a business professional and the effective operation of the organisation.

Learning Modes

Learning Mode	F/T Hours	P/T Hours
Lecture	36	
Lab	12	
Independent Learning	87	

Essential Material

- Burke, R. *Project Management Planning and Control Techniques*. 4th ed. UK: Wiley, 2003.

Supplementary Material

- Cadle, J. and D. Yeates. *Project Management for Information Systems*. 4th ed. USA: Pearson Education, 2002.
- Cleland, D. *Project Management : Strategic Design and Implementation*. 4th ed. USA: McGraw-Hill, 2004.
- P.M.I., U.S.A. *A Guide to the Project Management Body of Knowledge__ (PMBOK)_*. USA: Project Management Institute, 2003.

Requested Resources

- Room Type: Computer Lab
